Course Description:

The Foreign Purchaser Course (SAM-F) is designed for security assistance managers representing international purchaser/recipient countries, international organizations, and international employees of U.S. security assistance organizations (SAOs) overseas. The primary objective of the course is to address the planning and resource processes of requirements generation, budgeting, acquisition, and sustainment within a United States host country security assistance relationship. It provides students an opportunity to study U.S. laws, policies, and procedures governing the security assistance program. The course is tailored to present the significant aspects of the foreign military sales (FMS) program and the management concerns of purchaser and recipient countries. General course objectives are fourfold: to increase student understanding of the management of U.S. security assistance resources; to improve student knowledge of their responsibilities as individual security assistance resource managers; to enhance communications between purchaser/recipient country security assistance agencies and U.S. supporting agencies, thereby enhancing the overall efficiency of security assistance management; and to demonstrate the role of security assistance within the context of a civilian controlled military. Because the course is tailored to specific country needs, the mobile education team (MET) may or may not qualify for E-IMET. If subjects identified with an * in the syllabus provide a clear majority of the material presented, the course will use MASL IIN D305013 and is available for E-IMET credit. METs which primarily cover only the technical issues of security assistance will use MASL IIN D3050324 and are not available for E-IMET credit. With the possible addition of one instructor, the purchaser may request a concurrent five day Foreign Executive (SAM-FE)

course and/or an International Training (SAM-IT) course.
